Object Tracking Report

08 August 2026 12:28 AM

Tracking Summary

Detection Model	YOLO11
Tracking Algorithm	ByteTrack
Tracking Type	Multi Object
Unique IDs	Enabled

About Object Tracking

This module performs multi-object tracking using **YOLO11** together with **ByteTrack**. Each detected object is assigned a unique tracking ID that remains consistent across consecutive video frames. This approach is useful for surveillance, traffic monitoring, crowd analysis and smart vision applications.
